

Amalga Job Description

Position: Filament Winding Operator

Job Description: Perform required operations to set up and operate various sizes of filament winding machines. Load machines with tooling and fill machine with resin and fiber. Load oven with completed parts using overhead crane. Tolerances are not difficult to maintain due to the nature of tooling and machines. Gauge parts using diameter tapes. Work from specifications as to size and finish. Work is subject to process and final inspections.

Minimum Education or Certificate Requirement: High School diploma or G.E.D.

Minimum Time in Equivalent Position: Four months preferred.

Required Skills: Reading, writing, basic math, ability to carry up to 50 pounds, ability to stand at machine for full shift.
